SUMMARY

AI/ML-focused computer science engineering student skilled in Python, TensorFlow, Scikit-learn, and OpenCV with hands-on experience in machine learning, deep learning, and computer vision. Developed ML-based cybersecurity and OCR systems achieving up to 90% model accuracy. Strong in data preprocessing, model evaluation, and Power BI analytics, seeking machine learning engineer or AI engineer opportunities.

SKILLS

Java | Python | MySQL | TensorFlow | Keras | Scikit-learn | OpenCV | HTML & CSS | Javascript | React JS | Bootstrap | Github | VS Code | Data Analysis | Power BI | Figma | Analytical Thinking | Problem Solving | Team Collaboration | Technical Communication

WORK EXPERIENCE

Global Techno Solution <i>AI Intern</i> Engineered supervised machine learning models using Python and Scikit-learn for predictive analytics workflows. Performed data preprocessing, feature extraction, and model validation to improve classification performance. Collaborated within AI development workflows to support model optimization and experimentation.	06/2025 – 07/2025 Chennai , India
Coderz Vision Technology <i>Frontend Web Development Intern</i> Optimized UI responsiveness and debugging efficiency through iterative testing methodologies. Integrated frontend design improvements to enhance usability and cross-device compatibility. Participated in collaborative code review sessions and agile-based development workflows.	06/2025 – 06/2025 Chennai , India

PROJECTS

Intelligent File Integrity & Threat Detection Platform Architected an ML-based cybersecurity platform for identifying file integrity threats and system vulnerabilities. Achieved 85% threat detection accuracy using supervised learning-based anomaly detection techniques. Integrated real-time threat analysis and automated risk scoring mechanisms for vulnerability assessment. Optimized monitoring workflows to enhance cybersecurity threat detection efficiency.	06/2025 – 03/2026
CNN-Based Optical Character Recognition System Developed a CNN-powered Optical Character Recognition (OCR) system achieving 90% accuracy on the MNIST dataset. Leveraged OpenCV-based image preprocessing and character segmentation pipelines for improved recognition performance. Optimized deep learning inference workflows for multi-character image classification tasks. Implemented TensorFlow and Keras frameworks for model training, validation, and performance evaluation.	06/2024 – 03/2025

EDUCATION

B.E. - Computer Science Engineering (AI & ML), <i>Vel Tech High Tech Dr. Rangarajan Dr. Sathunthala Engineering College</i> CGPA : 8.23	09/2023 – Present Chennai , India
Higher Secondary Certificate (HSC), <i>WPA Soundrapandiyan Higher School</i> Percentage : 85	06/2022 – 05/2023 Chennai , India
Secondary School Leaving Certificate (SSLC), <i>Bethel Matriculation Higher Secondary School</i> Percentage: 85	06/2020 – 05/2021 Chennai , India
